VEGAFRUIT VEGETABLE PRODUCTS

Vegafruit vegetable products are products that are popular for winter use and storage. They are produced by marinating fresh vegetables, most of which are purchased from local farmers from Bosnia and Herzegovina. The production uses exclusively vegetables, which within 24 hours of harvesting comes to our plants and goes to the processing process. They are produced without preservatives and according to the traditional recipes. During the winter days, when there are no fresh vegetables on the market, it is used as an ideal replacement for the same and provides protection against colds during that period of the year. We use it as a source of vitamins, with the aim of strengthening the immunity. In the Vegafruit range you can find marinated cucumbers, peppers, pepperoni, beetroot, cabbage, ... and additives to the ajvar, đuveč and other meals. They are packed in glass jars of 370ml, 720ml and 2500ml.

VEGY KETCHUP

Vegy ketchup is a product category that has a completely redesigned new visual identity, but it retained the recognizable taste of the old Vegy ketchup. It is produced from the highest quality tomato variety, without genetically modified organisms and with a lot of vitamin C. It is produced according to the traditional recipe, which has undergone mild modifications according to the needs of our consumers. They are produced in two flavors: mild and hot. Mild ketchup is an ideal addition to pizzas, with a perfectly balanced oregano supplement, which will make your pizza the best snack for the whole family. Hot ketchup is the perfect addition to French fries and pasta, because its taste is perfectly balanced, and will satisfy your needs for spicy food. You can find our ketchup in two packages, 500g and 900g.
